DTK Bureau Service

DTK Textiles offers a custom bureau service for your logos, patterns and other designs. All custom bureau service items are shipped ready to heat apply- just remove any protective backing, position and press according to recommended settings.

Bureau service items are produced using the same high quality materials that DTK Textiles sells in roll stock form. All you need to begin using products is a heat press!

Pricing:

Due to the highly variable nature of custom items, each bureau service item is quoted based on total size and quantity ordered. Minimum orders are \$25.00 for pre-coloured Cad-Cut items and \$30.00 for full colour digital print items. No additional setup fees apply for standard, suitable, individual designs that exceed minimum order costs.

For a quote, please contact us today.

Turn Around Times:

Average turn around times are 3-4 working days, however larger jobs may require additional time to process and may need to be issued in batches.

Colour Matching:

DTK Textiles will match provided PANTONE MATCHING SYSTEM® spot colours upon request in vector artwork. Please note that the limitations of the CMYK process may result in variations from the chosen colour.

Artwork Requirements:

All raster file graphics are required to be 300 pixels per inch at the requested print size. Vector artwork should be provided in CMYK or spot-colour colour mode. Please convert all fonts to curves or provide used font files as required.

Supported files include: JPG, TIFF, AI, EPS, PDF, CDR.

These artwork requirements are a general guide only.

DTK Textiles reserves the right to reject jobs that do not meet artwork requirements.

Copyright:

DTK Textiles reserves the right to request written authority from copyright holders prior to processing any bureau service job.

PANTONE MATCHING SYSTEM® Is the property of PANTONE, Inc.

Pre-Spaced Names

Pre-Spaced Names make commemorative garments easy. Simply provide your names to DTK Textiles in a text file (one name per line) or in a spreadsheet (one name per cell), with an order form with the material, font and size you require, we'll do the rest. Pre-spaced Names are shipped cut, weeded and ready to heat apply.

Accessories

Accessories

There are certain products that are simply required for a business in the field of heat pressing and heat applied vinyls.

DTK Textiles offers a range of premium accessories to help your business function at its peak during day to day operations. For more information on techniques and processes to enhance your imprinting processes, please visit our website www.dtktextiles.com.au or call us on (08) 8357 5444 to speak to our friendly team.

Ez-Weeder:

This handy tool is used to easily weed excess film from Cad-Cut and digital print products.

Thermo Tape:

Heat resistant tape used to hold transfers in place during heat application. Adhesive will not attach to surfaces when pressed. Available in 9mm wide, 65.8m long rolls.

Heat Eraser:

Rub over freshly pressed heat transfers to absorb residual heat. Ideal for decreasing cooling times of "peel cold" transfers.

December 2017

Heat Seal Cover Sheets

Accessories

Whilst many products can be applied with a cover sheet, it is recommended to use one as it can protect your transfers, garments and heat press.

Teflon Sheets:

Protects garments and transfers during pressing processes. Used to cover your garment before pressing. This product is highly reusable.

3 micron:

46cm x 46cm: \$28.65 + GST

Kraft Paper Sheets:

Brown paper cover sheet. Can be reused a number of times.

Kraft Paper (38cm x 48cm):

5 Sheet Pack: \$7.20 + GST

25 Sheet Pack: \$32.85 + GST

100 Sheet Pack: \$125.00 + GST

Silicone Paper Sheets:

Brown paper cover sheet. Can be reused a number of times.

Kraft Paper (30cm x 42cm):

5 Sheet Pack: \$4.15 + GST

Heat Seal Accessories

Accessories

Accessories can help prolong the life of your heat press, enhance in printing quality and improve production times.

"Quick Slip" Platen Pad Protectors

Teflon based lower platen protectors are fitted to your lower platen in order to protect it from damage during use.

28cm x 38cm:

\$59.55 + GST

38cm x 38cm:

\$69.90 + GST

40cm x 40cm:

\$82.00 + GST

40cm x 50cm:

\$92.60 + GST

Teflon Pillows:

Teflon Pillows can be inserted into garments in order to protect against marks left by seams, buttons and zippers.

Adult 41 cm x 46cm:

\$53.75 + GST

Youth 41 cm x 28cm:

\$39.50 + GST

Short Sleeve 25cm x 18cm:

\$19.40 + GST

Long Sleeve 46cm x 13cm:

\$19.40 + GST

Set of one of sized each pillow (4 total):

\$118.60 + GST

Heat Press Pack

Accessories

Stahls' Heat Press Pack

\$50 with every Hotronix Heat Press from Stahls' Pacific or \$149.00 + GST

Contents:

Teflon Cover Sheet*

Durable cover sheet for heat transfers, can leave a gloss finish

Auto "Mag" Press Fact Sheet

A heat press machine is a corner stone of any garment imprinting business. When you're looking for a quality, reliable heat press that you can trust, you needn't look beyond Stahls' Hotronix.

Hotronix®
Tough, Serious Work Machines

Stahls' Hotronix heat press machines are amongst the most advanced in the world and feature innovations not seen in any other heat press on the market.

A heat press can be the most important piece of equipment for a textile decorating business. Stahls' Hotronix presses offer a superior level of quality, ease of use and massive potential. The Hotronix Auto Press range is no exception to this rule. The Auto Press range was designed to meet professional requirements while maintaining ease of use, this means that the heavy industrial user and the weekend hobbyist can both make effective use of the Hotronix Auto Press range with confidence. Offering features such as magnetic Jock down, auto open functionality and centralized pressure, the Auto Press range produces superior quality presses time and time again.

Every Hotronix Auto Press includes time saving features:

- The back lit digital LCD display allows you to accurately set press times, temperatures as well as monitor current temperature, pressure and remaining press time.
- Each Hotronix Auto Press comes with Stahls' patented Auto-Open feature. When the digital timer reaches zero at the end of a press, the press will automatically open, this means that every application will be perfectly consistent, even if you have to walk away while pressing.
- Magnetic lock down is a patented feature of all Hotronix Auto Presses and allows the press to operate at a semi automatic level, meaning operating a heat press has never been easier.
- Anyone who is experienced with heat pressing will tell you about the damage caused by strike through, when a press exerts too much heat or pressure and damages a transfer to the point that you can see the fabric showing through. Centralized Pressure, a feature of all Hotronix Auto Presses give you complete control over the pressure your heat press is set at and ensures that the pressure will be consistent across the entire platen.

For a full heat press demo, please contact our friendly staff on (08) 8357 5444 to book an appointment to visit our showroom.

Fusion Heat Press Fact Sheet

Heat Press

A heat press machine is a corner stone of any garment imprinting business. When you're looking for a quality, reliable heat press that you can trust, you needn't look beyond Stahls' Hotronix.

Stahls' Hotronix heat press machines are amongst the most advanced in the world and feature innovations not seen in any other heat press on the market.

Hotronix[®]
Tough, Serious Work Machines

Designed with the latest in high tech functionality. The Fusion and Air Fusion feature innovations such as digital presets, touch screen controls and huge steps forward in functionality.

Features of the Hotronix Fusion include:

- Touch screen controls
- Draw and swinger platen motion.
- Easily interchangeable platens.
- "Threadable" lower platen meaning that the lower platen can be slipped into garments.
- Digital time and temperature readout.
- Live digital pressure readout.

Features of the Air Fusion include:

- Effortless air powered button and foot pedal functionality.
- Touch screen controls.
- Easily interchangeable platens.
- Requires air compressor.
- Digital time and temperature readout.
